# Information Governance

Mitigate risk and ensure compliance with strategies and solutions for managing your data.

Information governance initiatives are more important, and more far-reaching than ever—encompassing data protection and privacy, retention and remediation strategies, eDiscovery data preservation and collection techniques, analytics, IT and business operations, and internal audits and controls. We can help you create and implement data management strategies to mitigate risk, create efficiencies, ensure compliance, and lower costs across your organization.

GUIDED SOLUTIONS

We can support you at any stage of your information governance program, from design of a framework and policies, to implementation of technology solutions to monitor, analyze, and preserve information—from the simple to the complex—across business units, software, communication and storage platforms, and regulatory requirements.

INDUSTRY-VETERAN EXPERTS

We know how to design frameworks and apply technology to reduce risk, drive efficiency, and ensure compliance, and can translate that expertise into a tailored Information governance program to achieve your objectives and manage your risk exposure.

TECHNOLOGY-POWERED WORKFLOWS

We can help you leverage the industry's best technologies and tools and our proven workflows to more efficiently and effectively manage data in a secure and compliant manner, as well as to automate your governance, risk and compliance (GRC) policies.
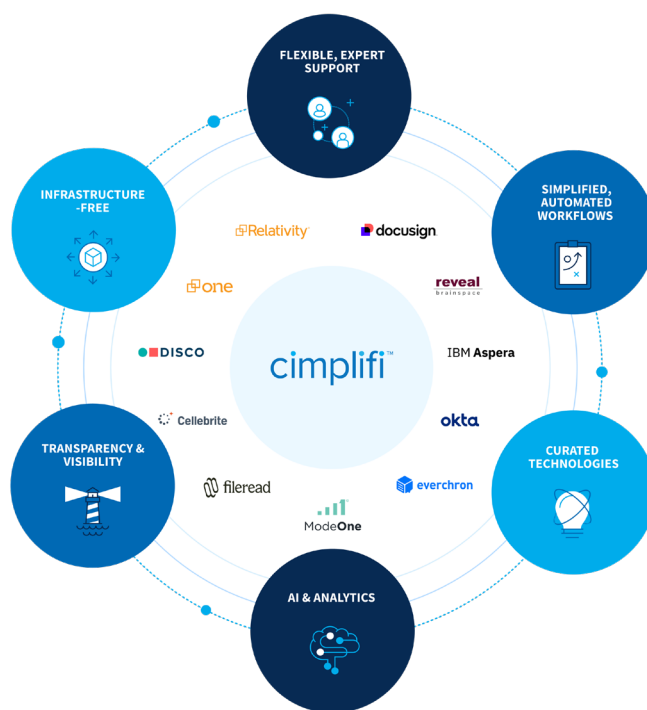

Comprehensive, scalable solutions for all aspects of your information governance initiatives.
